

Preparing Emerging Leaders!

Competency Based Leadership Education

The Advanced Management Program is part of TPMG's Competency Based Education platform. The Continuing Education Units (CEUs) awarded are nationally recognized and designed to provide a record of an individual's continuing education accomplishments.

The Right Fit at the Right Time

High potential employees emerging from their technical functions urgently require strong business acumen, sound judgement and effective people skills to grow and succeed. Entrepreneurs and small businesses leaders may not have the time nor the opportunity to complete a university MBA program. This is where the AMP becomes a valuable asset to both the emerging leader and the company where he/she works.

Cutting – Edge Content and Innovative Delivery

TPMG's Advanced Management Program empowers promising young managers to think strategically, manage cross functionally and lead with confidence. For one week a month, spread across 3 months, AMP participants benefit from cutting edge adult learning activities that include the case method, small group exercises, as well as leadership workouts for active learning and reflection.

Week One

Module 1 – Strategy and Finance

- Conduct analyses of income statements, balance sheets and cash flows.
- Know the internal/external data to analyze and develop a proper strategy
- Learn the role of senior leadership in managing strategy

Week Two

Module 2 – Operational Excellence

- Analyze the adequacy of company operations to generate and sustain profitability
- Understand and apply the principles and practices of Lean Management
- Apply Activity Based Costing (ABC) to improve operational efficiencies

Week Three

Module 3 – Management & Leadership

- Create a leadership system to focus action on strategy, work systems and results
- Understand people and their motivations, examine employee performance in new ways
- Plan, prepare and execute efficient and productive meetings

What to Expect

Collaborating with accomplished peers, guest speakers from top companies, and a TPMG Leadership Coach, AMP participants will acquire the leadership skills and business acumen to grow and succeed at higher levels of responsibility. While immersed in the program, participants will learn to build and lead high-performance cultures, apply new approaches to work with and through others, and to improve critical thinking skills in order to make good business decisions and solve problems.
